Victimization Rate per 100k
SOS
**2.7K**

Victims by Sex

Female 3258244

Male 3139318

Most offenders were known to the victim, *particularly acquaintances and intimate partners.*

Offender's Relationship With Victim

Victim was Boyfriend/Girlfriend 13.92%
Victim was Stranger 13.67%
Relationship Unknown 22.71%
Victim was Acquaintance 11.95%
Victim was Otherwise Known 8.6%
Victim was Spouse 5%
Other 24.14%

Representation is a difference between **arrest share (%)** versus **population share (%)**, where share is a selected group ratio towards the whole. Positive representation means **over-representation**, negative - **under-representation**.

Arrest Rate per 100k population
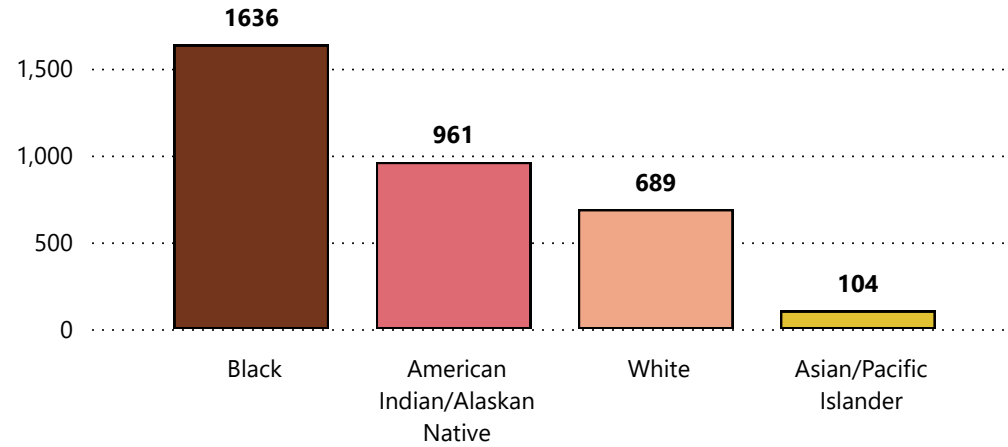

Arrestees Race Representation

Race	Representation
Black	18.5%
White	3.1%
American Indian/Alaskan ...	0.5%
Asian/Pacific Islander	-5.0%

The graph above shows that **black race people over-represent arrestees**, which is almost 20% less proportional to population share...

...but so are **male people** (the difference is even slightly bigger)...

...and **young people** too.

Arrestees Sex Representation

Sex	Representation
M	23.3%
F	-23.3%
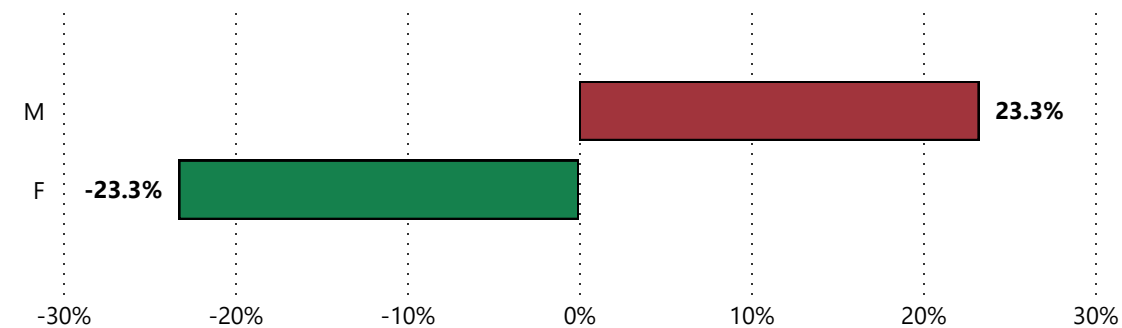

Arrestees Age Group Representation

Age Group	Representation
20-29	17.4%
30-39	12.3%
15-19	3.3%
40-49	-0.2%
50+	-32.7%
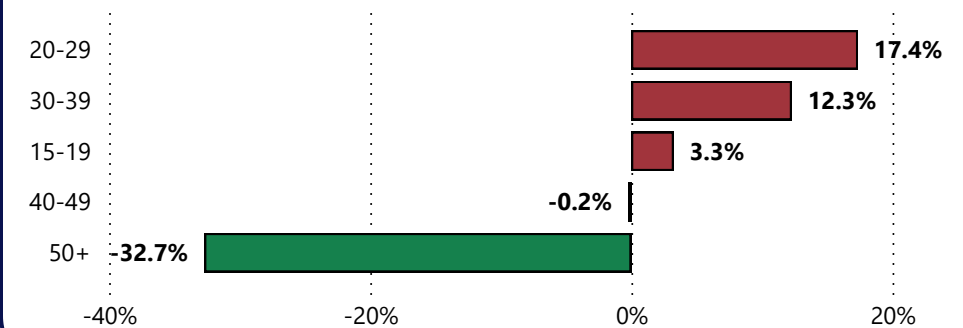

Top bias: Anti-Racial Black (35.2%)

Most hate crimes occur against the black race (35.2%), followed by against the white race (15.8%) and against male homosexuals (6.5%)

Crime analysis: USA FBI 2020 Data

Questions and answers

Which state had the most crime incidents? Most crime incidents occurred in Texas (which is 2'nd by population). The most common offense there were drug/narcotic violations (32.1%), simple assaults (24.1%) and drug equipment violations (11.9%).

Which offense categories dominate the crime structure nationally? Top 3 categories are left unchanged from the previous question: drug/narcotic violations (29.7%), simple assaults (22.2%) and drug equipment violations (15.4%).

When it's safest to be alive in US? Crime activity shows moderate seasonal variation, with lower incidents early in the week (Sunday - Monday) and during spring months

Are young people more likely to commit a crime? Kind of. The most arrested age group was 20-29 years (17.4% over-representation versus population age share). People who are 40+ age committed less crimes.

Did women become victims of crime more often than men? Yes, but absolutely insignificantly. Approximately 51% of victims were female and 49% - men.

Does crime data justify racial fear stereotypes? Absolutely no. Though normalized data shows that there is an over-representation towards black race offenders, overall, males are more likely to commit a crime than any other offender groups. Race data more than possibly could be explained and diluted with the additional data not captured in the dataset: poverty, urbanization and education in specific states. That is beyond the scope of the current analysis.

In which state were the most hate crimes committed in relation to the total population? Vermont.

How bad are things regarding hatred crime in the US? According to the data, approximately 6000 were hate crimes, which is only 0.1% of all crimes. However, not all crimes had biases specified, which may significantly affect the data. Hate crimes represent a small share of total offenses, yet disproportionately target specific minority groups, indicating that bias-motivated violence remains a persistent social issue despite its low overall frequency.

Condemn a person's actions, but not who they were born as. Thanks for reading.
